No: 2020-1-EL01-KA229-078939_5

TECHNOLOGY AS A SOLUTION FOR CLIMATE CHANGE

Climate Justice

Climate Justice is an environmentalist movement which means sharing the effects of climate change equally and fairly, securing the rights of the most vulnerable communities and developing to protect the rights of all species that we share the globe with. So the end of climate change is not just environmental and physical; it also means that it is a political, economic and ethical issue..
