TECHNOLOGY AS A SOLUTION FOR CLIMATE CHANGE

Short-term exchanges of groups of pupils

26th February-4th March
Mobility in Iasmos, Greece

Climate and Technology

In this short-term exchange students will study the measures taken by companies and countries in the framework of reducing carbon emissions and climate adaptation of existing technologies. They will develop new ideas to contribute to the already taken technological measures and will be able to express the ideas they generate in a sustainable way. They will visit a technical university and they will receive feedback by university teachers.
